

# Healing Touch **FOR WOUND MANAGEMENT**

## With Minden Medical Center Home Health Agency

Each year, approximately 8 million Americans suffer from chronic wounds and there are 1.1 million to 1.8 million new cases each year. 15% of all diabetics will develop chronic wounds.

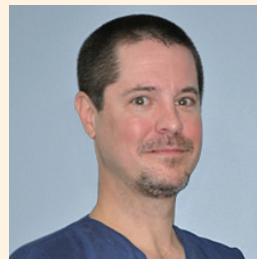

The effects wounds have on patients can be physically and emotionally challenging. Wounds often take a long time to heal, may be painful, and can limit a patient's function. Therefore, it is important that each patient with a wound receive the best possible care.

### Expert Care

Minden Medical Center Home Health Agency (MMCHHA) is pleased to offer a wound care certified registered nurse. Cliff Moss, RN, WCC, is trained and experienced in wound management, the healing process, and the selection and use of effective wound products and devices. Cliff brings 20+ years of home health experience to our area and is trained in treating all types of wounds including:

- Diabetic wounds
- Pressure ulcers
- Trauma wounds
- Surgical wounds

He works closely with patients, family, and caregivers to provide education on how to assist with the wound healing process and develop the best plan of care. MMCHHA respects every patient's unique health needs and believes that educating patients about their condition empowers them to become actively involved in their recovery.
